## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-50, 55-59, 64-68, 74 and 93 are drawn to rule-base system, classified in class 706, subclass 47.
  - II. Claims 51-54 and 110-113 are drawn to abstraction, classified in class 706, subclass 55.
  - III. Claims 60-63, 69-73, 75-91 and 94-96 are drawn to database, classified in class 707, subclass 1.
  - IV. Claim 92 is drawn to field value, classified in class 707, subclass 509.
2. The inventions are distinct, each from the other because:  
each is directed to separate invention.
3. Inventions groups I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. Group I recite rules while group II do not recite rules and group II recite abstractions while group I do recite abstractions. Group I recite rules while group

III do not recite rules and group III recite database or metabase while group I do not recite database or metabase. Group I recite rules while group IV do not recite rules and group IV recite a key field and an optional value field while group I do not have a key field and an optional value field.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).
